

UC1: User Management
This diagram shows:
1. GET /api/users — return all users as List<UserDto>
2. POST /api/users/staff — validate uniqueness, encode password, save, return 201
3. GET /api/users/{id} — find by id or 404, return UserDto
4. PUT /api/users/{id} — find by id or 404, update and save, return UserDto
5. DELETE /api/users/{id} — block self-deletion (400), find or 404, delete, return 200
